Later he received his Ph.D. in physics in 1955 from Stanford University and began work at the Hughes Research Laboratory. There he concentrated on creating a device capable of converting mixed frequency electromagnetic radiation into highly amplified and coherent light of discrete frequency. Maiman later found that the accepted calculations of the fluorescence quantum efficiency of ruby were wrong and that the material could be used for his research. His persistence with ruby eventually paid off for on May 16, 1960 the device he built using it became the world's first operable laser.

As Information Management put it on the strength of its currency and coverage alone, Franks' book is poised to take over as the recommended go-to reference for both students and IR professionals for many years to come. The new second edition cements this work's status as an up-to-date classic. Its content updated and expanded to address emerging technologies, most notably blockchain and evolving standards and practices, inside Franks presents complete coverage of the records and information lifecycle model encompassing paper, electronic, databases, office suites, email, and new media records, blogs, chat messages, and software, as a service informed by an advisory board of experts in the field and with contributions by noted authorities. The text addresses such key topics as the origins and development of records and information, the discipline of information governance and developing a strategic records management plan, creation, capture, and classification, retention strategies, inactive records management, archives, and long-term preservation, access, storage, and retrieval, electronic records, and electronic records management systems, the latest on rapidly evolving technologies such as web records, social media, and mobile devices, vital records, disaster preparedness and recovery, and business continuity, monitoring, auditing, and risk management, and education and training. This book's authoritative blend of theory and practice makes it a matchless resource for everyone in the archives and records management field. Instructor/Trainer Extras include a set of ready-to-go, customizable PowerPoint slides to accompany the text. Examination copies are available for instructors who are interested in adopting this title for course use.
