the aim and scope of this book primarily deals with conceptual design of sea going marine vessels while there are a few books on similar topics available to the reader this book takes a different approach to address the developments of many different types of vessels of significant interest would be the estimation of principal parameters of such as vessels and the various coefficients required for design purposes these parameters are obviously not readily available without carrying out an extensive search and background study hopefully this textbook may be of relevance to designers and career naval architects who need a reference to initiate the design process

energy makes the world work most of the worlds machines are powered by energy that comes from fossil fuels that are harmful to people and the environment in this fascinating book students will learn about alternative energy sources and the advantages and disadvantages of each they

can find out about how each energy is collected stored converted into power and used suitable for junior secondary this book combines 6 individual titles bound together in one bumper volume for a low pri

the report describes the skills required in the operation of an amphibious air cushion vehicle acv in army tactical and logistic missions the research involved an analysis of the acv characteristics operating requirements and environment and results of a simulation experiment the analysis indicates that acv operation is complicated by a an inherently slow vehicle response in certain control dimensions b a need for complex control coordinations in performing certain necessary maneuvers and c the acv s sensitivity to various aspects of the natural and man made environment the acv also poses unique requirements for navigation maintenance and collision avoidance the simulator study showed that acvs vary considerably in operability as a function of their control configuration and pointed to the need for further attention to the control problem in developing acv use overland a training program of from one to three months duration appears necessary to qualify an operator fully

traces relationships between the canadian mining industry and the transportation system
