this book represents the outcome of the second iwa leading edge conference held in sydney australia in november 2004 sustainability is a paradoxical concept we know we want to protect the environment from human induced change yet ecosystems are dynamic constantly changing and adapting in response to a multitude of factors the combined effect and subtleties of which are probably well beyond human calculation furthermore our conscious desire to protect the environment which forces us to think of humans as sitting outside ecosystems conflicts with the unavoidable fact that we are an unconscious actor within those ecosystems we must also recognise that the goal of protecting the environment is not a clear cut objective perhaps because of its complexity and propensity to change we cannot know what the fully protected environment would look like individual preferences too make the conceptualisation of an ideal state impossible do we strive for an ecosystem in which we play a minor part barely influencing natural outcomes or one that is more actively managed and provides for our needs or wants neither this volume nor the conference from which it draws resolve the paradoxes described above the papers presented here do however provide insight into the innovative thinking and practical projects undertaken across the globe that move us from patently unsustainable conditions to those in which our economic activity impact on ecosystems and desire for positive social outcomes are in better balance

trans boundary rivers between nepal and india have long signified both cooperation and dispute though both countries are highly interested in mutual cooperation for the development of the shared rivers their attempt to bring things to a successful solution has been hampered by debate several treaties and agreements have been signed over time by these countries such as the koshi agreement the mahakali treaty the gandak agreement etc while some of these have generated positive outcomes others are languishing for reasons political rather than technical nepal is not able to harness its water resources while india is seeking cooperation in order to utilise the shared water lack of trust negotiations and compromise along with vested political interests have affected the degree of cooperation over shared rivers between india and nepal to make cooperation more fruitful the two countries first need to build trust identify the merits and demerits compromise for the sake of the common good share information with each other and implement the mutually agreed upon cooperation package the essays in this volume bring together a spectrum of viewpoints on this issue this volume is the outcome of an international conference on this subject organised by the maulana abul kalam azad institute of asian studies kolkata makaias in collaboration with the b p koirala india nepal
