this book investigates through the problem of the earth s shape part of the development of post

newtonian mechanics by the parisian scientific community during the first half of the eighteenth century in the principia newton first raised the question of the earth's shape john greenberg shows how continental scholars outside france influenced efforts in paris to solve the problem and he also demonstrates that parisian scholars including bouguer and fontaine did work that alexis claudet Clairaut used in developing his mature theory of the earth's shape the evolution of parisian mechanics proved not to be the replacement of a cartesian paradigm by a newtonian one a replacement that might be expected from thomas kuhn's formulations about scientific revolutions but a complex process instead involving many areas of research and contributions of different kinds from the entire scientific world greenberg both explores the myriad of technical problems that underlie the historical development of part of post newtonian mechanics which have only been rarely analyzed by western scholars and embeds his technical discussion in a framework that involves social and institutional history politics and biography instead of focusing exclusively on the historiographical problem greenberg shows as well that international scientific communication was as much a vital part of the scientific progress of individual nations during the first half of the eighteenth century as it is today
