stage lighting the fundamentals is written specifically for introductory stage lighting courses the book begins with an examination of the nature of light perception and color then leads into a conversation of stage lighting equipment and technicians lamps luminaries controls dimming and electricity form the basis of these chapters the book also provides a detailed explanation and overview of the lighting design process for the theatre and several other

traditional forms of entertainment finally the book explores a variety of additional areas where lighting designers can find related future employment such as concert and corporate lighting themed design architectural and landscape lighting and computer animation new for this edition enlarged full color illustrations photographs light plots and examples of lighting design updated information on led lighting and equipment expanded discussion of the practical use of color as a designer expanded discussion of psychological perceptual effects of color new discussion of color mixing through light sources that make use of additive mixing expanded discussion of industry professions expanded discussion and illustrations relating to photometrics expanded discussion and examples of control protocols and new equipment and updated designer profiles along with the addition of still more designer profiles

revised and updated the second edition of explorations in computer science a guide to discovery provides introductory computer science students with a hands on learning experience designed to expose students to a variety of subject areas this laboratory manual offers challenging exercises in problem solving and experimentation each lab includes objectives references background information and an in depth activity and numerous exercises for deeper investigation of the topic under discussion

kadoc artes 8the art of illumination usually associated with the middle ages experienced a spectacular revival in nineteenth century western europe this completely different context gave the illuminations another import the output of the lay and religious workshops reveals a great artistic stylistic technical and thematic diversity the works illuminated go far beyond the world of exceptional and precious manuscripts and include many occasional documents and devotional images richly illustrated with unpublished masterworks the revival of medieval illumination is an overview of the form by fifteen authors who do not limit their approach to the traditional questions of art history rather they explore the historical sociocultural ideological and religious components of the revival which changed according to time and country in order to understand the evolution and success of the art of illumination in the long nineteenth century

the book s organization follows a layered approach that builds on basic principles light as a medium part 1 tools of a lighting designer part 2 design fundamentals part 3 and lighting applications part 4 this presents students with a practical and logical sequence when learning basic concepts the full spectrum of the lighting design process is presented in detail giving students an example of how one might develop a lighting design from script analysis through concept and plot development and all the way to an opening this detailed process with a step by step design approach gives students a plan to work from which they can later modify as they mature and gain confidence as designers the text contains a more comprehensive discussion of basic technology light as a physical phenomena and methodology of designs than is found in most introductory texts bridging the gap between introductory and advanced lighting courses the text will appeal to theatrical designers who want to venture into areas of lighting like architectural or virtual lighting design while at the same time gaining a solid grounding in the fundamentals of lighting design lighting design will also benefit illuminating engineers who want to move away from mere computational approaches in lighting and on to explore techniques along the design approaches of theatrical lighting design the final 9 chapters cover many specialty areas of lighting design highlighting the unique and shared qualities that exist between the different aspects of these elements

discussions involve traditional entertainment areas like theatre as well as lesser known facets of the industry including film video landscape lighting retail museum lighting virtual lighting concert spectacle performances and architectural lighting models of design tasks demonstrate the actual use and development of plots sections schedules photometrics tables and cut sheets rather than simply talking about what they are this hands on approach provides students with a firm understanding of how to actually use these tools and processes

this book of readings is a flexible resource for undergraduate and graduate courses in the evolving fields of computer and internet ethics each selection has been carefully chosen for its timeliness and analytical depth and is written by a well known expert in the field the readings are organized to take students from a discussion on ethical frameworks and regulatory issues to a substantial treatment of the four fundamental interrelated issues of cyberethics speech property privacy and security a chapter on professionalism rounds out the selection this book makes an excellent companion to cyberethics morality and law in cyberspace third edition by providing articles that present both sides of key issues in cyberethics
