is your child getting lost in the system becoming bored losing his or her natural eagerness to learn if so it may be time to take charge of your child's education by doing it yourself the well trained mind will instruct you step by step on how to give your child an academically rigorous comprehensive education from preschool through high school one that will train him or her to read to think to understand to be well rounded and curious about learning veteran home educators susan wise bauer and jessie wise outline the classical pattern of education called the trivium which organizes learning around the maturing capacity

of the child's mind and comprises three stages: the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules; the middle school logic stage in which the student begins to think more analytically; and the high school rhetoric stage where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child, whether full time or as a supplement to classroom education, in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude. In those subjects, thousands of parents and teachers have already used the detailed book lists and methods described in the well-trained mind to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns; the well-trained mind will give you the tools you'll need to teach your child with confidence and success.

Statistics for Business explains the fundamentals of statistical analysis in a lucid, pragmatic way. A thorough knowledge of statistics is essential for decision making in all corners of business and management. By collecting, organizing, and analyzing statistical data, you can express what you know, benchmark your current situation, and estimate future outcomes based entirely on Microsoft Excel. This book covers a spectrum of statistical fundamentals from basic principles to probability, sampling, hypothesis testing, forecasting, statistical process control, and Six Sigma management. This second edition is packed with features to aid understanding and help ensure that every aspect of your knowledge of statistics is applicable to practice, including icebreakers introducing each chapter that relate statistics to the real world drawn from management and hospitality situations, detailed worked examples in each chapter, over 140 case exercises complete with objective situation requirements and answers, a complete glossary of key terminology and formulas, mathematical relationships, and Excel relationships and functions. A brand new companion website containing slides, worked out solutions to the case exercises, and a test bank coming soon with a clear and accessible style, this book makes statistics easier to understand. It is ideal for business management, tourism, and hospitality students who want to learn how to apply statistics to the real world.

New technologies are dramatically changing the face of education and the nature of childhood itself. In *Shift to the Future*, Nicola Yelland examines the ways in which these technologies are reshaping the social, personal, and educational experiences of childhood and explores the curricular revisions such changes demand, with a focus on the various information and communications technologies available to young students and the possibilities these technologies offer for teaching and learning.

shift to the future provides inspiring examples of teachers who have innovatively incorporated new technologies into their classrooms to engage their students in contemporary times

this comprehensive one volume commentary offers accessible concise explanations of the purpose and content of each biblical text
