regular commercial contacts between europe and asia date back to at least the early years of the christian era but the pattern of trade underwent a structural modification following the portuguese discovery of a

route to the east Indies via the Cape of Good Hope this volume illustrates the consequences of the arrival of large numbers of Europeans in the East. Europeans both participated in modified and exploited existing trade relationships in the Indian Ocean and the Pacific. The studies reprinted here show how some environments such as Japan were hostile whilst most states welcomed the European commercial contact. The necessity for Europeans to pay for Asian goods using precious metals is emphasised by the inclusion of articles in monetary transfers in Asian trade a phenomenon which provides a link between economic developments in the Americas and those in Asia from the 16th century onwards.

This first edition is a work in progress of 424 pages and 127 000 words. It includes a biography, 1 550 catalogue records and 700 images of the estimated 3 000 works of art painted by Haughton Forrest. Members of the Forrest Project compiled a web-based catalogue that included a history of Haughton Forrest and his family, an inventory of his paintings with information on provenance and ownership and a virtual gallery of images of as many paintings as could be obtained. This pooling of energy, enthusiasm and expertise has achieved a great deal. It now finds monumental expression in this splendid book that will stimulate wider interest in Forrest and provide a solid foundation for further research and reappraisal of his work. Michael Bennett, Professor of History, University of Tasmania.
