the classic anthropological analysis of religion from a pioneer in the field from the preface scientific efforts to learn just what are the forms and functions of religion have not been few it is the purpose of this book to review some of them and to synthesize the suggestions and findings my own personal feeling is that sociological viewpoints including much of social anthropology tend to focus on the scaffolding and milieu of religion rather than on religion itself and that religion can be best understood from a combination of psychological and cultural points of view this book is not i think motivated by a need to destroy by dissection a way of thinking and acting that many educated people feel is of little use or is even disadvantageous in a world increasingly committed to the search for scientific and technological solutions of human problems rather i aim to preserve a friendly detachment in the asking of fundamental scientific questions about religion
