christianity he demonstrates set in motion one of the most profound revolutions the world has known wilken tracks the growth of christian communities around the ancient world and shows how the influence of christianity led not only to the remaking of cultures but also to the creation of new civilizations he explores the powerful impact of the rise and spread of islam on christianity and devotes several chapters to the early experiences of christians under muslim rule in the middle east egypt north africa and spain by expanding the telling of christian history to encompass perspectives beyond just those of the west wilken highlights how interactions with new peoples and languages changed early christian practices even as the shared rituals of christian people bound them in spiritual unity despite their deep cultural differences ambitious and wide ranging this highly accessible volume abounds with lively tales and fascinating connections the christian century

this book provides a philosophical socio political and theoretical understanding of the notion of becoming in the context of the related concepts and in contemplation of the notion of being deriving from different traditions from various countries these concepts act as windows on contemporary early years settings and communities around the world where adults map out infant becomings this book is a valuable resource for early childhood educators students professionals researchers and policy makers around the globe who seek to understand the locatedness of infant becomings in space and time

the first 1 000 days from conception to two years of age is a critical period of growth and development exposures to dietary environmental hormonal and other stressors during this window have been associated with an increased risk of poor health outcomes some of which are irreversible the book addresses this crucial interval of early life across biological disciplines linking concepts related to all biological fields to outcomes during the first 1 000 days e g fetal growth and pregnancy outcomes and beyond e g gut microbiome and cardiovascular disease later in life the strength of this book lies in its cross disciplinary nature

your child can achieve great things a few years ago pregnant women in four corners of the world heard those words and hoped they could be true among them were esther okwir in rural uganda where the infant mortality rate is among the highest in the world jessica saldana a high school student in a violence scarred chicago neighborhood shyamkali the mother of four girls in a low caste village in india and maria estella in guatemala s western highlands where most people are riddled with parasites and moms can rarely afford the fresh vegetables they farm greatness it was an audacious thought given their circumstances but they had new cause to be hopeful they were participating in an unprecedented international initiative designed to transform their lives the lives of their children and ultimately the world the 1 000 days movement a response to recent devastating food crises and new research on the economic and social costs of childhood hunger and stunting is focused on providing proper nutrition during the first 1 000 days of children s lives beginning with their mother s pregnancy proper nutrition during these days can profoundly influence an individual s ability to grow learn and work and determine a society s long term health and prosperity in this inspiring sometimes heartbreaking book roger thurow takes us into the lives of families on the forefront of the movement to illuminate the science economics and politics of malnutrition charting the exciting progress of this global effort and the formidable challenges it still faces economic injustice disease lack of education and sanitation misogyny and corruption

available online pub norden org nord2021 037 the report provides an overview and short systematic review of the psychosocial interventions and psychological tests used in the nordic countries during the first 1000 days of a child s life i e from the prenatal period until two years of age a total of 63 interventions and 33 tests were reviewed findings reveal that although a large number of interventions and tests are available for the target groups in the nordic countries evidence regarding their effectiveness or psychometric properties is often lacking or insufficient thus it is important that research efforts be enhanced in the nordic region to strengthen the evidence base of the interventions and instruments that

practitioners rely upon in order to assess and support mental wellbeing for nordic children and families during this critical period in their lives
